

Dear ECNY Members,

If you are presently a QEI or QEIS inspector of Lift Technologies, Inc., you need to re-certify with a new organization. As of June 23<sup>rd</sup>, Lift Technologies International, Inc. will no longer be recognized by ASME.

Below is contact information for two organizations that have qualified elevator inspector and qualified elevator inspector supervisor programs. The first is NAESA International. You can access the required forms at their website, [www.naesa.org](http://www.naesa.org). Go under the heading, "Certifications", and choose "Transfer QEI Certification". The package can be completed online and a JPEG photo forwarded to them. You can also contact NAESA at 360-292-4968.

Additionally, the Elevator Industry Work Preservation Fund also has a program. You can contact Ms. Carla Souder at 410-312-1474 to receive your application package. They also have a process to forward you the package by email for your submittal to them.

Please note that time is running out, so you should not hesitate. Hesitating may result in either of these two organizations not accepting your transfer.

Trusting the above information suits your needs at this time, please call if any additional information or clarification is required.

Sincerely,

Nicholas J. Montesano  
Membership Chairman
